Part #	Description	Introductory Price
AXB999110A	Dust Sentry Level Sensing Unit	\$148.00

Designed to let you know when your dust container needs to be emptied to prevent over filling.

Transformer ▶ Uses a low voltage transformer (110 V) to power the sensor and strobe light.

Diffuse Infrared Sensor

- ▶ Adjustable range. Set depth from 1" - 20".
- ▶ Sensor mounts through lid of drum with retaining nuts.
- ▶ Also suitable for Liquids

Strobe Light / Box

- ▶ Low voltage strobe light mounted to small electrical junction box.
- ▶ Wiring connections for power supply, switch and strobe light contained in box.
- ▶ Pre-wired strobe can be mounted in conspicuous location for easier visibility.
- ▶ Low voltage and amperage LED technology.

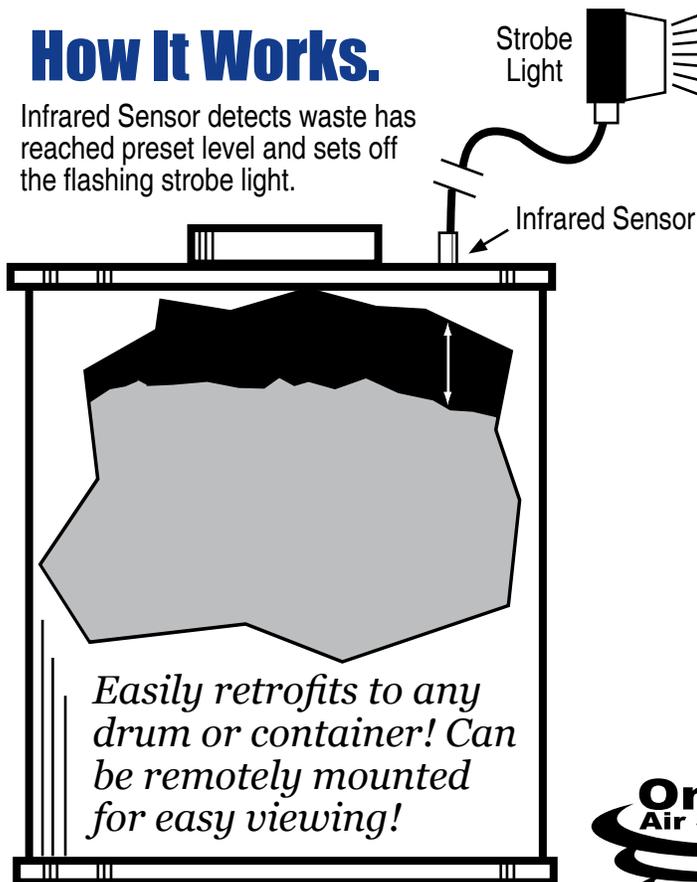

▶ 90 Day Warranty

*Oneida reserves the right to change or modify specs and system appearance without notice. Actual system appearance may vary.

The Oneida Dust Sentry™ with adjustable IST (Infrared Sensing Technology), flashes a strobe light to alert you when the dust in your container reaches your preset level, telling you when it's time to empty the container.

How It Works.

Infrared Sensor detects waste has reached preset level and sets off the flashing strobe light.

Easily retrofits to any drum or container! Can be remotely mounted for easy viewing!

You'll never unpack a cyclone and filter full of chips again!

Dust Sentrys are designed to work with Oneida systems. If it is being used with another manufacturer's system, system must be properly grounded.
