The Original Dust Deputy[®]

U.S. Patent # 7,282,074

Dust Deputy™ Cyclone Retrofit

Clear Plastic Static Dissipating Dust Deputy™

Part #	Description	Introductory Price
AXD000009	2" Tapered Inlet Clear Plastic Dust Deputy™ Includes: 9 Gal. Static Dissipating Plastic Dust Bin / 61" Hose / Connecting Elbow / Hardware / Dust Bagger	\$199.00
SDS090000	9 Gallon Static Dissipating Plastic Dust Bin	\$77.00

Stage 1 - The debris passes through the Oneida Air Systems Dust Deputy™ where the cyclonic action separates out 99%+ of the dust and deposits it into the 9 gallon collection box before it goes to Stage 2.

Stage 2 - The fractional percentage of dust that makes it through the Dust Deputy™ is then deposited into the Festool collection bag.

Stage 3 - The few particles of dust that escape the bag then pass through the Festool's HEPA filter where 99.97% of particles .3 microns and larger are trapped, leaving the escaping air ultra-clean.

Big 9 gallon capacity dust box tackles planers, moulders and routers.

Specially designed to fit the Festool CT Shop Vacuum but can be used wet or dry with any shop vacuum.

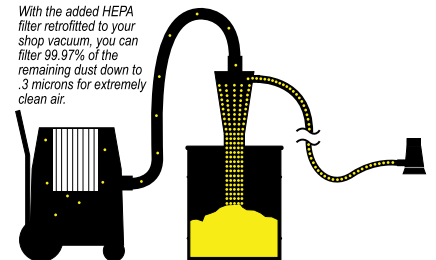

How It Works:

Only about 1% of the waste gets to the shop vacuum.

With the added HEPA filter retrofitted to your shop vacuum, you can filter 99.97% of the remaining dust down to .3 microns for extremely clean air.

Cyclone separates 99% of the dust before it reaches your shop vacuum. No filter clogging and no loss of suction.

Accessories

Replacement filters for your shop vacuum. Filters are easily cleaned by blowing from the outside with compressed air.
