New Super Dust Deputy 4/5 Adapts to Widest Range of Single Stage Dust Collectors

SYRACUSE, NY (April 4, 2022) – Made in the USA, the new Super Dust Deputy® 4/5 by Oneida Air Systems is a cyclonic separator designed to work with nearly any 1 to 3HP single stage dust collector. It is the first separator that eliminates the need for right-sized fittings, allowing you the flexibility to change your setup with ease.

Based on the original patented Super Dust Deputy—which connects to a single stage dust collector and separates 99% of dust and debris from the airstream to eliminate filter clogging and suction loss—the new Super Dust Deputy 4/5 includes two 4" OD adapters that allow the cyclone's inlet to connect to 4" or 5" hose and the outlet to connect to 4" or 6" hose as needed.

While the Super Dust Deputy 4/5 is designed to fit 4", 5" or 6" flex hose right out of the box, it can also be connected to ducting with additional adapters. Made from static dissipative material to prevent static buildup, the 4/5 cyclone measures 14" wide by 23" tall and is compatible with all Super Dust Deputy drum kits from Oneida Air Systems. It can also be mounted to any airtight drum or barrel.

The Super Dust Deputy 4/5 is available now from oneida-air.com for \$179.95 MSRP. It is sold with the 4/5 cyclone, two 4" adapters, gasket, and hardware.
